1. Introduction. Circadian clocks are ubiquitous endogenous and self-sustaining timekeeping networks that are able to either continue to oscillate as free rhythms under constant environmental conditions or be entrained by variations in external cues (Harmer, 2009).

Product Details. The AD9833 is a low power, programmable waveform generator capable of producing sine, triangular, and square wave outputs. Waveform generation is required in various types of sensing, actuation, and time domain reflectometry (TDR) applications.

Fatigue life. The American Society for Testing and Materials defines fatigue life, N_f , as the number of stress cycles of a specified character that a specimen sustains before failure of a specified nature occurs. For some materials, notably steel and titanium, there is a theoretical value for stress amplitude below which the material will not ...
